HEALTH & MEDICAL RESEARCH

1) Foundation for Fighting Blindness Accepting Applications for Individual Investigator Research Award
   - **Deadline:** November 12, 2018 (Letter of Intent)
   - **Amount:** up to $100,000

Individual Investigator Research Grant Awards are designed to concentrate research in areas that will have the greatest potential to move towards treatments and cures for the inherited orphan retinal degenerative diseases and dry age-related macular degeneration (dAMD). N.B.: FFB does not support research for neovascular AMD or diabetic retinopathy. The Foundation has identified Research Priority Areas (RPA) that align with its mission and this targeted open call for application is to address specific gaps identified in current retinal disease research. While applications addressing the areas of particular interest below will be given priority consideration, the FFB will also consider proposals for highly novel research that do not fit easily within these goals The LOI for such proposals must clearly explain why the research is likely to lead to prevention, treatments or cures for the orphan inherited retinal degenerative diseases.

1) Lamont-Doherty Earth Observatory of Columbia University Offers Postdoctoral Fellowship in the Earth and Environmental Sciences

- **Deadline:** November 12, 2018
- **Amount:** $139,500 over 2 years

Lamont-Doherty Earth Observatory of Columbia University invites applications for Postdoctoral Fellowships in the fields of Earth and environmental sciences. Candidates should have recently completed their Ph.D. or should expect to complete their degree requirements by September 2019.

Researchers at the Observatory work to understand the dynamics of the Earth’s chemical, physical and biological systems, from the core to the upper atmosphere, including Earth’s interactions with human society. Our scientists lead research in the fields of solid Earth dynamics; ocean, atmospheric and climate systems; cryospheric dynamics; paleoclimate and biogeoscience. There is also an opportunity for a fellowship in forest ecology with a fieldwork component at the Black Rock Forest Consortium, a research facility near the Lamont Campus.

The principal selection criteria for Fellows are scientific excellence and a clearly expressed plan to investigate problems at the forefront of Earth science. Applications from all related fields are welcomed.

Fellowships are supported institutionally for 24 months, include a $7,500 research allowance, and carry an annual salary of $66,000. Successful candidates will be encouraged to apply for external funding and may be eligible for further internal awards and positions. LDEO is especially interested in qualified candidates whose record of achievement will contribute to the diversity of the Observatory’s scientific personnel.

ADDITIONAL OPPORTUNITIES (includes Urban Excellence, Jewish Scholars, Pub. Policy)

1) Bruner Foundation Accepting Submissions for Award for Urban Excellence
   - **Deadline:** December 12, 2018
   - **Amount:** $50,000 for Gold Medalist; $10,000 for Silver Medalists

A program of the Bruner Foundation, the Rudy Bruner Award for Urban Excellence is a national design award that recognizes transformative urban places distinguished by their economic and social contributions to America’s cities. Founded in 1986 by architect Simeon Bruner, the award seeks to promote innovative thinking about the built environment and to advance conversation about making cities better by celebrating and sharing the stories of creative and inspiring urban development (projects).

One gold medal and four silver medals are awarded each biennial, with the gold medalist receiving a $50,000 cash prize and each silver medalist receiving $10,000. To be eligible, projects must be urban, built (not just a plan or a program), in operation long enough to demonstrate impact, and located within the continental United States.

The award is intended to be a point of departure for the exploration of urban excellence and the role of design in cities and a resource for anyone interested in learning about urban development. It is distinguished by its extensive application and selection process and the detailed documentation of the winners.
